

Thermo pocket for ground pad

Drainage tie

Hammock can be used on both sides - with or without the net

Ultra-Light Revolution: One of the world's lightest hammocks, with mosquito net and thermo compartment

The ultra-light hammock ADVENTURE MOSKITO HAMMOCK THERMO comes with a practical mosquito net and built-in pocket for a ground pad (ground pad not included).

Both fabric and mosquito net are impregnated with TANATEX insect protection. This impregnation provides lasting protection against flying insects such as mosquitoes and biting midges as well as against crawling insects such as ticks, ants, cockroaches and mites, which will not even sit on the material or the net.

Despite this the impregnation has been proven to be completely safe for humans. It is also kind to the skin, odourless, heat-resistant and washable (up to fifty washes).

The ADVENTURE MOSKITO HAMMOCK THERMO is ultra-light, the pack dimensions are very small, and both sides can be used: with or without the net. But it is also extremely robust and can hold up to 150 kg.

You get in from the side by opening a double zip. The net is kept away from the body using the cord enclosed. Generous interior thanks to the patented spreader bars (included). 2 drainage ties included.
